

ANGELO MIGUEL R. CUA

Computer Engineer | IT Infrastructure | Data Analysis & ERP | Automation | Embedded Systems
angelomiguelr.cua@gmail.com | +63 992-330-9269 | [Portfolio](#)

PROFESSIONAL PROFILE

Computer Engineering graduate with hands-on experience across IT support, network and server administration, ERP data workflows, business reporting, and embedded systems. Experienced with SAP Business One (SAP B1) and Power BI for operational data analysis and reporting, alongside web development, hardware integration, and AI-assisted technical automation. Comfortable moving between infrastructure, software, and physical systems to deliver practical end-to-end solutions.

CORE TECHNICAL SKILLS

IT Infrastructure	LAN/WAN setup and troubleshooting, structured cabling, routers, switches, wireless APs, IP addressing, DHCP/DNS, PBX/IP-PBX, Windows Server, Active Directory, firewalls, NAS, backup and recovery
Data Analysis & ERP	SAP Business One (SAP B1), ERP data workflows, Power BI, Microsoft Excel, operational reporting and dashboard-based analysis
Programming & Web	C, C++, Python, Java, PHP, Laravel 12, Vue 3, Inertia.js, Filament, Tailwind CSS, Vite
AI & Automation	Claude Code, reusable Skills, agents/subagents, project instruction workflows, AI-assisted scripting, documentation, and repeatable development tasks
Embedded Systems / IoT	Arduino, ESP32, Raspberry Pi, RFID, sensors, actuators, basic IoT integration and hardware-software interfacing
Hardware / Security	PC and laptop diagnostics, repair and upgrades, OS deployment, preventive maintenance, CCTV installation and support
Engineering Tools	Git/GitHub, AutoCAD, Fusion 360, SolidWorks, Blender, Microsoft Office

PROFESSIONAL EXPERIENCE

Data and Support Engineer - McAsia Food Trade Corporation	<i>Apr 2026 - Present</i>
- Provide day-to-day IT support and data operations across user workstations, ICT/security systems, and internal business systems. - Maintain network and server infrastructure, including Windows Server and Active Directory environments, firewall configuration, user access, and related troubleshooting. - Use SAP Business One for ERP-related data handling and operational support, and Power BI to analyze and present business data through reports and dashboards. - Apply scripting and AI-assisted automation, including Claude Code Skills and agent/subagent workflows, to streamline repeatable technical, development, and documentation tasks.	
Freelance Computer Technician & IT Support - Self-employed	<i>2019 - Present</i>
- Diagnose and repair laptops, desktops, and network equipment for individual and small-business clients. - Install and upgrade operating systems, applications, and hardware; perform preventive maintenance and resolve connectivity, security, and performance issues.	

SELECTED ICT & SECURITY DEPLOYMENTS

Organizations: McAsia Food Trade Corporation, Luxe Prime Realty, Medical Gallery Corporation, and Camfin Lending Inc.
Scope: network and CCTV installation, Windows Server/domain/Active Directory setup, firewall configuration, NAS and Plex server deployment, structured cabling, and hardware support.

KEY PROJECTS

Attendance Monitoring System - Web Application

Laravel 12 & PHP | Vue 3 & Inertia.js | Filament | Tailwind CSS | Vite

- Developed a web-based employee attendance platform with a timeclock interface and administrative dashboard for attendance monitoring and management.
- Integrated RFID, facial recognition, and ZKTeco fingerprint workflows; tracked late arrivals, undertime, overtime, daily hours, audit logs, and department-level records.
- Implemented geofenced attendance validation and offline record synchronization, plus employee and department management and attendance reporting.
- Integrated Arduino Nano, sonar sensing, RFID, and body tracking; delivered the contracted thesis project with a custom RFID turnstile for access control.

Robotics & Embedded Systems

- Timelight - Arduino Nano speech-timing device with buzzer and LED indicators for audible and visual timing cues. Portfolio: badjau.github.io/timelight
- RFID Keyless Entry System - designed and implemented an RFID-based access system for a client.
- Robot Arm Prototype - designed and built a low-cost prototype using recycled materials for rapid concept validation.

Network Infrastructure & Server Administration

- Designed, installed, and maintained small-office and home networks using routers, switches, wireless APs, IP addressing, DHCP/DNS, and structured cabling.
- Installed and configured NAS/Plex servers, Windows Server domains, Active Directory, firewalls, user permissions, and access-control settings.

EDUCATION

Bachelor of Science in Computer Engineering - STI College Novaliches 2022 - 2026

Bachelor of Science in Aeronautical Engineering (Undergraduate) - FEATI University 2017 - 2022

CERTIFICATIONS & TRAINING

- Basic Occupational Safety and Health for SO1 - 10-hour course with 2-hour Training of Trainer (TOT), Think Safe Training, Consultancy and Services Corp., June 2025.
- Introduction to Cybersecurity: Securing the Digital World of Connectivity - ICpEP Singapore and Saudi Arabia Chapters, March 2025.
- Building Cloud-Native Telecom Services: The Role of SDN and NFV in Mobile and Broadband Networks - ICpEP Singapore and Saudi Arabia Chapters, March 2025.
- Next-Gen AI in Action: Transforming Academe and Engineering Workflows - ICpEP Singapore and Saudi Arabia Chapters, July 2025.

RECOGNITION

- Best in Implementation - ICT-COE Project Symposium and Exhibit, November 2025.
- Best in Communication - ICT-COE Project Symposium and Exhibit, November 2025.
